## OPEN SOURCE PROJECTS

### Kafkatal

CLI App written in Go to tail deserialised logs from kafka on console

<https://github.com/HandOfGod94/kafkatal>

### VSCode XML Language Plugin

XML language plugin for VSCode which provide auto-completion and validations

<https://github.com/HandOfGod94/xml-language-server>

### k3s Digitalocean Homelab

A cloud homelab setup using digitalocean, hosting a k3s node, exposed over tailscale VPN and monitoring setup via NewRelic and Bugsnag

<https://github.com/roadmap-ai/>

## SKILLS

**Languages** Java, Go, Ruby, Elixir, Clojure, Python, Typescript

**Framework** Rails, GRPC, Phoenix, Flask, React Native

**Tools** Kafka, Sidekiq, PostgreSQL, Envoy, NewRelic, Prometheus, Redis, Apollo federation, Tailscale VPN

**Cloud/API** GCP, Kubernetes, CircleCI, Docker, Gitlab CI/CD, Github Actions, GraphQL, RestAPI

# GAHAN RAKHOLIA

TDD - XP - Generalist - Developer

## EXPERIENCE

### Tech Lead - Jiva (2023 - Present)

- Lead key projects, covering ledger management, loans and accounting for our users, payment gateway integration, ERP integration
- Improved observability in existing system and contributed in standardising dev-ops activities using IaC
- Managed and negotiated with stakeholders for scoping out new requirements for finance-users, ops-users and end-users
- Cultural change: Introduced continuous micro-feedback cycle rituals to keep remote team engaged.
- Streamlined prod support culture and rotation among devs.
- Oversaw adoption of pair-programming and XP practices.
- Streamlined feature pipeline to get better predictability of feature delivery
- Lead and delivered time sensitive complex integration ERPNext integration project as part of cost saving initiative

### Software Engineer - Level 3 (Senior) - Gojek 2019 - 2023

- Contributed and lead multiple feature including sandbox env creation, DR setup, simplifying multi pipeline payment architecture of a high throughput (100K RPM), highly distributed digital payment system (Gopay wallet)
- Increased observability and ensuring four nines uptime for our payment system
- Contributed and lead features on our in-house promo allocation engine using Ruby-on-Rails
- Lead, created and contributed on promo analytics feature from scratch for GoBiz App

### Software Engineer - JDA Software (Blue Yonder) 2016 - 2019

- Maintained and contributed to in-house supply chain app development platform and framework
- Integrated JS unit testing framework with legacy code base
- Performed various PoC for integration tools such as NiFi, Camel

## EDUCATION

**Bachelor Of Technology**, Computer Science  
SRM University | 2012 - 2016
